September 1, 2020

Friends,

We are glad to introduce our Air Lite Max prestretch 7.4 micron- with Symphony's D2W bio-degradable additive-

Products added to our stock product line include:

EWHF161507A-Max80-Bio: case pack 15" x 1476' - 7.4 micron cast pre-stretch- 4 rolls/cs- 64 cs/plt

EW162007A-Max80- Bio: bulk pack 15" x 1968' - 7.4 micron cast pre-stretch- 224 rolls/plt

NoCo- No Core 8.4 mic pre-stretch- case pack or bulk pack- custom made as needed.

The Bio-degradable D2W technology accelerates the natural process of oxidation until the product is no longer a plastic to a material which can be bio-assimilated by bacteria or fungi on land or sea. Best of all, if it escapes collection and ends up as litter in environment, then it will degrade and bio-degrade in a continuous, irreversible and unstoppable process.

Please contact your sales rep. to get your prices and availability.

Above products are being added to our current stock offering of Bio-Degradable products which includes:

- **18" 80 gauge 1500' hand film (CHF1880A-Bio)**
- **20" 80 gauge 5000' (CMF2080A-Bio) machine film.**

We can further custom make any of our 500 stretch film products with our D2W bio-degradable additive.

All the above items can be combined to our 1500 stock items- to get volume discounted prices

We appreciate your business and support and look forward to growing together.

Any questions, please reach out to your sales rep.

**Sincerely,
WT Management**
