Blown Hand

Blown Machine

Manufactured using a blown extrusion process, this product is more resilient than cast film and has more load holding power.

- BHF – Traditional blown hand
 - 60 to 120 gauge

- BMF – Traditional blown machine film
 - 60 to 120 gauge
 - Stretches 200-250%
 - Rolls can be boxed

Blown film is made by heating resin, blowing it out vertically into a bubble, and then cooling it gradually while it is pulled by rollers.

****Custom sizes, colors & thickness can be made upon request – Minimum Order Quantity applies****
